## (54) RADIO COMMUNICATION CONTROL SYSTEM

(57)Abstract:

PURPOSE: To neglect a received notice command when there is any error and to fetch it as an effective command when no error exists, by transmitting continuously the notice command from the transmission side for plural number of times and checking the error of the received notice command at the receiving side.
CONSTITUTION: A command having the same frame format as the HDLC procedure is transmitted from the transmission station for plural number of times. That is, an attribute notice command representing the picture element density, the paper size and a compressing system or the like is provided in an information section of the frame and this is transmitted continuously from a command generating section 24 for plural number of times. The receiving station checkes errors of the received command at a command analysis section 25, and if there is any error, the said command is neglected and when ≥I command without error exists, it is fetched as the effective command. After the effective command is received, the 1st page of the picture information is received and when it is finished and the next page exists from the transmission station, a continuous transmission notice command is transmitted continuously for plural number of times, and when the effective command of the said command exists in the receiving station, the 2nd page of the picture information is received. Similarly, this operation is continued until the communication end notice command is received.
